

## Dr. Waybrun J. Hebert III

Podiatric surgery is surgery performed on the foot, ankle, or lower leg. Podiatric surgery is performed at Physicians Medical Center by Dr. Waybrun J. Hebert III, a Board-Certified Podiatrist who deals specifically with these types of problems. The problems may result from birth defects, heredity, trauma, arthritis, physical stress, improper shoes, muscle and joint imbalances, and even the hard surfaces on which you walk.

Podiatric surgery differs from other surgical procedures because of the special characteristics and functions of the lower extremity. In addition to supporting your weight, the foot is subjected to repeated abuse with each step. Providing immediate treatment and preserving the best function possible are key factors in podiatric surgery.

Dr. Waybrun Hebert is a native and resident of Houma. He has practiced podiatry in the Houma area since 1997. He graduated valedictorian from Grace Christian Academy. Immediately after graduation he enlisted in the Navy where he worked as a hospital corpsman for almost 10 years. He attended the University of Texas where he obtained a Bachelor of Science degree. He went on to attend the University of Osteopathic Medicine and Health Sciences College of Podiatric Medicine and Surgery and obtained his Doctor of Podiatric Medicine degree in 1995. He did his reconstructive surgery residency at Doctor's Hospital in New Boston, Texas. He is board-certified by The American Board of Podiatric Surgery and is a Fellow of the American College of Foot and Ankle Surgery. He specializes in surgical correction of foot deformities and diabetic wound care. He has performed several volunteer mission trips to Mexico to repair foot deformities.

If you have questions about any of these conditions, Dr. Hebert can explain the condition and treatment options. His office is located at 1025 West Tunnel Blvd in Houma, La. He can be reached at 985-868-2973.
